

# Polyurethane Foam Profiles for Boat Builders

We make rigid polyurethane foam insulation and cut it into profiles for use in boat building, transport, and general fibreglassing.

## We can cut:-

### Imaginative shapes

The profile you need to make the part. Put your imagination to work, tell us what you need.

### Hull Stringers

Tall, short, squat or skinny, with square corners, rounded corners, straight sides curved sides, and either symmetrical or non-symmetrical.

### Corners

At 90°, under or over 90°, big or small, flat face, curved face or somewhere in between, with or without cable recesses.

### General Shapes

### Letters

### Pipe Insulation

Rectangles, circles, ovals, triangles etc, in whatever diameter, height or width you need.

Letters and numbers in any font and size

Pipe insulation of any wall thickness to suit any size pipe.

You can buy as little as length in either our 34/35 kg/m<sup>3</sup> density general purpose foam, or for something a lot stronger, our 75 kg/m<sup>3</sup> density PU foam.

As well as cutting shapes we also cut sheets of foam, and blocks of buoyancy foam.

Give us a call, we would like to give your imagination a quote..
